

## WriteLog on the air Keyboard Shortcuts V10.40J

**Log window** ..... CTL-N  
 enter with cursor in Edit mode..... CTL-Y  
 (use arrow keys to move to desired QSO and field)

Delete QSO ..... Right-Click QSO  
 Ignore QSO for scoring ..... highlight QSO & type X  
 restore: .....highlight QSO & type Space  
 QSL, mark to send ..... Right-Click QSO  
 QSO, correcting: .....double-click field to open QSO Edit  
 save change..... Enter  
 undo change before saving ..... CTL-Z  
 window close ..... double-click on background  
 Scroll: down one line..... CTL-↓  
 down one page..... Page Down  
 up one line..... CTL-↑  
 up one page..... Page Up

**Messages** ..... *End all messages with a space.*

Function keys: program with "Setup CW/RTTY Messages"  
 pull-down menu or Shift-Fn (voice). (Message contents  
 vary according to operator taste and contest requirements.)

Repeat field in exchange ..... Click button over field  
 To program: ..... Shift-Click button over field

Special message parameters:

CW speed up / down ..... < or >

CW prosigns:        AA +        BT -  
                       AR @        KN #  
                       AS ]        SK [  
                       error Delete

Field *n* from QSO Entry window ..... %Fn

Hello *name* (extract from "Hi" file) ..... %H

His call ..... %D or

If cursor in call field, wait until user finishes

typing call before continuing ..... %C

Insert data from user (prompt now) ..... %I

Memory *n* inserted here (1-11, 21-31=shift) .... %Mnn

My number..... %n, *n*=1 to 5 (min # digits)

Previous QSO's exchange field *n* ..... %Pn

Previous QSO's serial number ..... %PO

QSO before message ..... %B *text* %B

RTTY Return key ..... %R

RTTY end of transmission ..... %E

Speed increase or decrease ..... < or >

Time of day ..... %T

**Rate window:** Select single- or all-band rate.... Right-click

**RTTY window** ..... *Right-click for other actions*

Callsigns, queue of RTTY received ..... ALT-C

Letters case, shift receive to ..... ALT-L

Move selected characters to QSO Entry window .....

..... Left click

Invert Ltrs/Figs..... Shift-Left click

Only highlighted part of call.....CTL-Left click

**QSO Entry window** ..... CTL-P

Abort message in progress..... Escape or  
 ..... Shift-Home or CTL-C\*

Band: next lower freq ..... ALT-F1

next higher freq ..... ALT-F2

Callsigns, queue of RTTY received ..... ALT-C

CQ message ..... F11 or F1\* or

..... Enter (cursor in empty callsign field)

Cursor, move to

end of current field ..... End

end of last field ..... CTL-E ("end")

left one character ..... ← or CTL-B ("backward")

next field ..... Space or Tab

previous field ..... Shift-Tab

right one character ..... → or CTL-F ("forward")

start of current field ..... Home

start of first (leftmost) field ..... CTL-A

CW: speed: faster ... ALT-F10 or Page-Up; ALT-Shift-F10†

slower ..ALT-F9 or Page-Down; ALT-Shift-F9†

weight: heavier ..... Shift-PgUp

lighter ..... Shift-PgDn

Delete character

previous character ..... Backspace

under cursor ..... CLT-D or Delete

Delete in the current field

entire field ..... CTL-W ("wipe")

to right of cursor ..... CTL-K ("kill")

Delete QSO ..... ALT-W ("wipe") or

..... CTL-Backspace or F11\*

Delete QSO number: ..... Clear the callsign field, or

..... CTL-A & Backspace

Enter QSO:

Send TU msg (with corrected call if changed).....

..... + or Enter (cursor not in callsign field)

Silent logging ..... Shift-Enter or CTL-Enter

Frequency: go to ..... type freq in call field, Enter

Split transmit freq ..... -

Frequency scratchpad memory

toggle to/from..... CTL-Tab

exchange memory with current QSO..... Shift-click

move between entries..... Tab, Shift-Tab

set # of scratchpad entries ..... Right-click

Gab, send a network ..... ALT-G

Go to QSO .....enter call fragment (\*, ? wildcards) or

.....enter log sequence number

then ..... CTL-G ("go")

Headphone, latch to non-xmtg radio ..... CTL-X\*\*

His Call + Exchange / QSO B4 ..... F10 or Insert or

..... Enter (cursor in non-empty callsign field)

Keyboard sending ..... Alt-K

Mode, changing ..... CTL-F1 or CTL-F2

Note, create a ..... ALT-N

QTC:

receive QTC window ..... ALT-R

request fill on QTC #*n* ..... ALT-*n*

send QTC window ..... ALT-S

Radio, switching:

activate radio with keybd focus for xmit ..... CTL-R

keybd entry only ..... Shift-↑ or Shift-↓

keybd entry and transmit ..... ↑ or ↓

transmit only ..... CTL-↑ or CTL-↓

Received calls (RTTY only) ..... ALT-C

Repeating CQs ..... ALT-T ("timed repeat")

RIT, clear the offset ..... \*

RTTY receive: shift to Letters case ..... ALT-L

Spot: announce ..... CTL-T or ALT-F3

Return o 0.00 kHz ..... F12
